The Most Trusted Provider of Business Phone Numbers

Global Call Forwarding offers international business phone solutions tailored to support your communication needs. Experience high-quality audio and enterprise-class reliability and manage your calls from anywhere with our intuitive control panel and web-based softphone. Our telecom experts provide assistance and advice to help you create a phone system best-suited for your business.

Global Coverage
160 Countries

Cloud phone numbers available from most major and hard-to-reach countries worldwide.

Centralized Management

An easy-to-use online control panel to manage users, distributed teams, and call flows.

Dedicated Account Management

A telecom expert will be assigned to help you build a voice solution that works for your business.

Responsive Customer Support

24/7 customer and technical support to keep your phone system running smoothly at all times.

Our Long-Term Clients

Over the past 26+ years we have developed long term relationships with thousands of businesses including:

Scalable and Trusted Communications

- Voice access to global markets in 160+ countries
- Integrate our service with your existing PBX system with SIP trunks
- Make and receive calls seamlessly over broadband, WiFi, and cellular data
- Simple pricing with no contracts or commitments
- Stay connected with our Softphone app on Windows, macOS, iOS, and Android

Some of our Included Features

- Smart Call Routing**
Never miss a call by using advanced call routing rules. Forward calls to your teams, wherever they are located.
- Auto Attendant / IVR**
Improve caller experience by managing and automating your call flows efficiently with our IVR editor.
- Outbound Calling and Caller ID Management**
Easily update your caller ID within the Softphone app and control panel when placing outbound calls.
- Call Recording**
Record and store phone recordings to review on-demand in the future with our call recording software.
- Call Detail Records**
View call history, listen to recordings and voicemails, and track important call metrics.
- Control Panel and Mobile App**
Communicate with business contacts from any device and any location.
